Desirée Moya Pérez

Tema 1

## Fundamentos de Git I

1. Instala Git en tu sistema operativo. Adjunta una captura de pantalla en la que aparezca el resultado de la ejecución del comando `git --version`.

2. Realiza la configuración de Git según lo indicado en el tema (nombre, correo electrónico y editor de preferencia). Adjunta una captura de pantalla con el resultado de la ejecución de los comandos de configuración.

```
Git CMD
C:\Users\desmp>git config --global user.name Desiree
C:\Users\desmp>git config --global user.email desmp7@gmail.com
C:\Users\desmp>git config --global core.editor "Visual Studio Code"
C:\Users\desmp>git config --global credential.helper wincred
C:\Users\desmp>
```

```
Git CMD
C:\Users\desmp>git config --list
diff.astextplain.textconv=astextplain
filter.lfs.clean=git-lfs clean -- %f
filter.lfs.smudge=git-lfs smudge -- %f
filter.lfs.process=git-lfs filter-process
filter.lfs.required=true

3. Crea una carpeta denominada S1R1. Realiza las siguientes acciones en ella:

a) Crea un repositorio Git.

```

o) Crea un archivo denominado datos.bak. Añade tres títulos de libros a dicho archivo.  
¡IMPORTANTE! No añadas el archivo al área de preparación ni hagas ningún commit.

p) Crea una subcarpeta denominada output. Crea un archivo denominado salida.txt en su interior. Escribe tu nombre y apellidos en dicho archivo. ¡IMPORTANTE! No añadas los archivos al área de preparación ni hagas ningún commit.

q) Haz una captura de pantalla del comando git status. Deben aparecer los archivos datos.bak y output/salida.txt como archivos nuevos (color rojo).

r) Crea un archivo .gitignore para que los ficheros con extensión .bak y el contenido de la carpeta output/ no se incluyan en el repositorio.

The screenshot shows the Visual Studio Code editor interface. The top menu bar includes 'Archivo', 'Editar', 'Selección', 'Ver', 'Ir', 'Ejecutar', 'Terminal', and 'Ayuda'. The title bar reads '.gitignore - Visual Studio Code'. The Explorer sidebar on the left shows a file tree with 'Inicio', 'libros.txt', 'Peliculas.txt', 'Datos.bak.txt', 'salida.txt', '.gitignore', and 'Comidas.txt'. The main editor area displays the content of the '.gitignore' file:

```
1 *.bak.txt
2 output/salida.txt
3
```

The status bar at the bottom indicates 'master' branch, line 2, column 18, with settings for 'Espacios: 4', 'UTF-8', and 'CRLF'.

s) Haz una nueva captura de pantalla del comando git status. Ahora no deben aparecer los archivos datos.bak y output/salida.txt como archivos nuevos, sino que en su lugar debe aparecer únicamente el archivo .gitignore.

The screenshot shows a Windows command prompt window titled 'Símbolo del sistema'. The command executed is 'C:\Users\desmp\Desktop\DAW\Desarrollo web entorno cliente\Practica1\S1R1>git status'. The output is as follows:

```
